Joris NITIEMA

Master's student in Econometrics-Statistics, Aix-Marseille School of Economics

Looking for a 3 to 4 month internship (May – August 2027): data science, econometrics, applied statistics

Marseille, France | jorisalverick@gmail.com | joris-nitiema.github.io | LinkedIn

Profile

Statistician trained at ISSEA (the statistics school of the CEMAC region), now a Master's student at AMSE. I turn survey and administrative data into indicators, models and dashboards that support decisions. Experience in a national statistics institute and in a ministry of finance, across the whole chain from data collection to reporting.

Education

Aix-Marseille School of Economics (AMSE), Aix-Marseille University 2026 – present
Master 1 in Econometrics-Statistics, taught entirely in English Marseille, France

ISSEA – Sub-regional Institute of Statistics and Applied Economics 2023 – 2026
Analyst Statistician diploma, data science track Yaoundé, Cameroon

- Admitted through the competitive entrance exam shared by ENSAE Dakar, ENSEA Abidjan and ISSEA.
- Ranked 1st of 19 in the final year (16.38/20, highest honours); 3rd of 28 in the first and second years.

Experience

National Institute of Statistics (INS) – End-of-studies internship Mar – Jun 2026
Department of demographic, socio-economic and environmental statistics Yaoundé

- Measured the multidimensional vulnerability of households in municipalities hosting internally displaced people (PESoP 2024 survey, 2,686 households).
- Composite index by MCA, typology by hierarchical clustering, drivers by an ordered logit model under the survey design. Thesis graded 17.20/20.

Ministry of Finance (MINFI) – Internship Jul – Sep 2025
Forecasting Division, real economy monitoring unit Yaoundé

- Cocoa production and exports (2015–2025): decomposition of quarterly series, trend, seasonality and short-term forecasts.
- Dashboard of agricultural indicators replacing calculations previously redone by hand in Excel.

ISSEA – Survey supervisor (2025) and enumerator (2024) 2024 – 2025
Household surveys Yaoundé

- Supervised enumerators, ran consistency checks and validated data; face-to-face interviews (household survey on urban safety).

Projects

- **Queue-reduction dashboard** (R Shiny): 255,000 real bank operations, activity by type, branch and day, and a simulator estimating the waiting time saved by moving simple operations to digital channels. See the project
- **EcoTrack Local** (Python, Django; team of 3): web app to track and compare prices by neighbourhood in Yaoundé, with dashboard, interactive map, anomaly detection and CSV export. See the project
- **Vocab Combo Trainer** (R Shiny): English–French vocabulary trainer with game modes, progress tracking and AI-assisted correction. See the project

Skills

Statistics and surveys. Sampling design, weighting, questionnaires, PCA, MCA, clustering, composite indices.
Econometrics and forecasting. Linear models, logit/probit, ordered logit, time series and forecasting.
Data science. Supervised learning, model evaluation, NLP, exploratory analysis.
Tools. R (Shiny, ggplot2), Python (pandas, scikit-learn, Django), SQL, Stata, SPSS, Power BI, Excel/VBA, LaTeX, CSPro, ODK.
Certificates. IBM: Machine Learning with Python, Python for Data Science, R for Data Science, SQL and Relational Databases; Coursera: R Programming for Statistics and Data Science.

Awards

Award of Excellence, ISSEA (first of the class) 2026
Excellence Prize of the President of Faso 2020

Languages and interests

French (fluent), English (fluent), Mooré (native)
Chess, reading, football, artificial intelligence
